[EN VERSION]  
August 24, 2026

## EXPERIENCES

Quality Assurance Engineering Intern  
**Ansys, Synopsys**

📅 6 months: 04/2025 – 10/2025    📍 La Farlède, France

In collaboration with the Ansys' Optics QA team, I helped improve the validation processes by **converting from manual to automatic** unitary tests using gRPC, IronPython, and Python, with the creation of improved **multivariable image comparison** Python function built with OpenCV saving as much as 75 hours of workload per software release.

Topics : [gRPC](#) [OpenCV](#) [PySpeos](#) [PyTest](#) [Speos](#)

Embedded Hardware Designer Intern  
**Synnav**

📅 5 months: 04/2024 – 09/2024    📍 Vernon, France

In collaboration with an electronics engineer, I helped design one testing tool for the Syde product, enabling the creation of usage scenarios through a **Python library** that communicated via UART with an STM32H7 microcontroller programmed in C. Which allowed reliable and automatic scenario simulation, scaled the **quality control** process, and reduced reporting effort.

Topics : [C](#) [CubeIDE](#) [Embedded Systems](#) [STM32](#) [Python](#)

Retail Vendor Manager Intern  
**Amazon**

📅 6 months: 09/2023 – 03/2024    📍 Clichy, France

In collaboration with a Senior Vendor Manager, I helped provide two tools to optimize business performance and drive sales growth: an Excel macro to **identify licensed selection twenty times faster**, allowing deep dives in large datasets, uncovering trends, and taking action; and a **comprehensive and visually appealing Dashboard** in Excel, facilitating benchmarking at various levels of granularity, simplifying the identification of growth opportunities and the implementation of new strategies.

Topics : [Data Analysis](#) [Data Visualization](#) [Process Optimization](#) [SQL](#) [VBA](#)

Neuroscience Research Intern  
**ISIR, Sorbonne Université**

📅 3 months: 05/2023 – 08/2023    📍 Paris, France

Developing a user-friendly simulation environment using Webots and Python, facilitating the assessment of the **sensorimotor modelization** of the hippocampus based on the framework proposed by Benoît Girard and Sylvain Argentieri.

Topics : [Bash](#) [Git](#) [OpenCV](#) [Scikit-Learn](#) [Webots](#)

Head of Team  
**Phoenix Robotics Team of UNICAMP**

📅 1 year: 07/2021 – 07/2022    📍 Campinas, Brazil

Improve Team Members' selection process, aiming for more diversity, resulting in the best inscription ratio, over 125 people from 500, and resulting in the **best percentage of women** among the approved, 16 from 35 people.

Topics : [Communication](#) [Leadership](#) [Project Management](#)

## EDUCATION

MSc Engineering in Robotics  
**ENSTA, Institut Polytechnique de Paris**

📅 3 years: 2022 – 2025    📍 Palaiseau, France

Machine Learning, Image Analysis and Indexing, Deep Learning, Dynamics and Control of Systems, FPGA Xilinx, Kalman Filter, Software Engineering, Parallel Programming, Vision, Vivado HLS / SDK.

Topics : Extra research and innovation courses at the [École Polytechnique](#) during the final year.

BSc Engineering in Control and Automation  
**FEM, UNICAMP**

📅 8 years: 2019 – 2026    📍 Campinas, Brazil

Topics : The [Academic Laurel](#) recognition for excellent academic performance.

## ABOUT ME

I'm a 25 years old **Brazilian** with dual **Portuguese** nationality holder of a BSc engineering degree in control and automation from UNICAMP and MSc engineering degree in robotics from ENSTA.

I'm seeking a **full-time position** in software development ideally with hardware involvement, available to start from August 2026 and willing to move worldwide.

## LANGUAGES

|              |              |    |
|--------------|--------------|----|
| English :    | Fluent       | C1 |
| French :     | Fluent       | C1 |
| Portuguese : | Native       | C2 |
| Spanish :    | Intermediate | B1 |

## SKILLS

**Programming :** [Python](#) [JavaScript](#) [C / C++](#) [LaTeX](#) [Bash](#) [Assembly](#) [CSS / HTML](#) [gRPC](#) [IronPython](#) [Java](#) [MATLAB](#) [VBA](#) [VHDL](#)

**Softskills :** [Agile](#) [Communication](#) [Design](#) [Project Management](#) [Leadership](#)

**Tools :** [Git](#) [GitHub Actions](#) [WSL](#)

## VOLUNTARY

Paralympics Volunteer  
**Paris 2024**  
📅 2024    📍 Villepinte, France

Ambassador  
**Patronos UNICAMP**  
📅 2021    📍 Campinas, Brazil
